

# TEMPORAL BONE-ANZA 5.0

***Dr. Vinay Kumar Vijayendra***

***PRE-CONFERENCE***

***LIVE TEMPORAL BONE DISSECTION DEMONSTRATION***

***4<sup>th</sup> June 2026 (09:00 AM - 06:00 PM)***

U R Rao Bhavana, Jawaharlal Nehru Planetarium Campus  
Sri T. Chowdiah Road, High Grounds, Bangalore - 560 001

Dear Colleagues,

This year marks the 5th edition of “Temporal Bone-anza” our live temporal bone dissection demonstration. I am truly overwhelmed by the response to the previous four editions and I am extremely grateful to the feedback and support received from juniors and seniors alike.

It is especially heartening to hear that it has inspired many otologists, especially the postgraduates and juniors to start their journey of temporal bone dissections and explore its wonderful anatomy.

**Dr. Vinay Kumar  
Vijayendra**

The success of any good otologist can be attributed to their mastery over the anatomy of the temporal bone. The temporal bone, with all its twists and turns provides a unique challenge to every budding otologist. This demonstration aims to familiarise the delegates with the temporal bone exercises, starting from a myringotomy, all the way up to the internal auditory meatus.

Keeping with the theme of “Finesse in otology”, I will be demonstrating how one can practice the finer points of dissection which can be replicated in live surgeries to achieve finesse. This pre-conference workshop will also orient you and help to lay a foundation, which will help you assimilate the intricacies of various ear surgeries that you will witness during the next 3 days of “Finesse in otology 2026”.

We have chosen a new venue this year, the brand new state-of-the-art U.R Rao Bhavana auditorium housed within the Jawaharlal Nehru Planetarium campus.

We have also planned to make it much more interactive this year, ensuring maximum participation from the audience.

I am sure that this live interactive session will be of great benefit, especially to postgraduate students and young consultants.

I invite you all to be part of this pre-conference dissection demonstration.

**Dr. Vinay Kumar Vijayendra**

Course Director, Temporal Bone-anza 5.0

The following are some of the exercises which will be demonstrated

Stapedotomy

Transcanal facial nerve decompression

Lesser Petrosal Nerve

Anatomy of Cochlea

Cortical mastoidectomy

Epitympanotomy

Facial recess approach

Transmastoid facial nerve decompression

Endolymphatic sac decompression

Labyrinthectomy

Anatomy of Vestibule

Internal auditory meatus

Dissector : Dr. Vinay Kumar Vijayendra

Moderators : Prof. Dr. Vijayendra Honnurappa  
Prof. Dr. K.C Prasad  
Dr. Sangeetha R
